Services offered:

A customizable “Parent Empowerment program” to engage and empower the parents of special needs children.

Personal Profile:

I believe that a child’s mode of learning is through play, and the best therapist and a teacher for the child is the parent. A parent, through fun filled, playful activities can bring in magical improvements in a special needs child, to complement the necessary professional intervention.

I’m passionate about collaboratively working with parents, to help in channelizing the golden time that a parent spends with their child.
